

Change Management

Understanding the core principles and process framework of Change Management is an essential but often overlooked requirement for effectively preparing for, supporting, and implementing organisational change.

If you fail to plan, you plan to fail. Many change initiatives fail because core process, logistical or tactical details were misunderstood or worse, completely missed.

This 1-day intensive course focuses on the mechanics of the change management process and provides a practical and repeatable step-by-step approach to effectively managing change.

Target Audience

This course is suitable for those involved in managing large or small organisational change initiatives.

This course can be packaged with our **Dealing with Change** workshop which explores the human side of change.

Duration 1 day (9am – 4pm)

Investment \$895 per person

For more information or for a tailored proposal please contact TP Human Capital on 4772 3800.

Workshop Outcomes

- A new methodology for Change Management – Change, Transition, Adoption & Adaption (CTAA)
- Utilising Project Management techniques to deliver successful Change Management
- Identifying and understanding the High-Risk points of Change Management – Initiation, Transition, Adoption
- Risk Analysis and Mitigation in the Change Management process

Facilitated by

Anton Klekar

Anton is the Senior Advisor for Strategic SCM and has over 30 years' experience in project management, change management and strategic supply chain management. He built his knowledge and experience from the ground up, working with large organisations in Australia including Xstrata Copper, Glencore, Anglo Coal and BMA, as well as consulting with global financial institutions and project teams across South East Asia, India, and Europe.
