

Continuous Improvement

Continuous Improvement philosophy focuses on continuous elimination of waste or non-value-added elements from processes to give customers the best possible product / service with the least amount of waste.

This concept can be applied with organisational teams who have direct contact with external customers as well as teams working to provide increased value for internal customers.

This 2-day intensive workshop explores the systematic and purposeful application of a continuous improvement philosophy to create an environment of evolutionary progression within your organisation.

Target Audience

This workshop is suitable for people who are leading or are involved in creating a culture of continuous improvement.

This course can be packaged with our **Applied Change Management** workshop which explores processes and systems for change initiatives.

Duration 2 days (9am – 4pm)

Investment \$1,600 per person
